

Live Consulting Gig – “Process” Checklist

The purpose of this document is to guide the individual teams (02 red triangle, 03 blue square, etc.) with respect to what is expected at the Teams site and when. All of this information is already available in the [ConsultingGigDeets.pdf](#) document @ Moodle.

Sprint #1 — March 10th to 14th

Thursday, March 13th @ 09:30 — the names of the students representing the aggregate teams need to be updated in the “Questions for Aaron” document at Teams, as well as any questions that the team has.

Friday, March 14th @ 18:00 — each individual team should have uploaded the following documents to the Teams instance:

- Completed “Team Agreement Canvas”
- Product Backlog – include name of Product Owner for the week
- Scrum Backlog – include name of Scrum Master for the week
- Potentially Shippable Product – your team’s analysis for the week.
- Sprint Review / Retrospective

Sprint #2 — March 17th to 21st

Thursday, March 20th @ 09:30 — the names of the students representing the aggregate teams need to be updated in the “Questions for Aaron” document at Teams, as well as any questions that the team has.

Friday, March 21st @ 18:00 — each individual team should have uploaded the following documents to the Teams instance:

- *updated* Product Backlog – include name of Product Owner for the week
- Scrum Backlog – include name of Scrum Master for the week
- Potentially Shippable Product – your team’s analysis for the week.
- Sprint Review / Retrospective

Sprint #3 — March 24th to 28th

Thursday, March 27th @ 09:30 — the names of the students representing the aggregate teams need to be updated in the “Questions for Aaron” document at Teams, as well as any questions that the team has.

Friday, March 28th @ 18:00 — each individual team should have uploaded the following documents to the Teams instance:

- Completed “Team Agreement Canvas”
- *updated* Product Backlog – include name of Product Owner for the week
 - Note: by the end of this sprint, all of the work should be done
- Scrum Backlog – include name of Scrum Master for the week
- Potentially Shippable Product – your team’s analysis for the week.
- Sprint Review / Retrospective
